# Unit 8: Introduction to Visual Basic Objects

In this assignment, you will create interfaces for **six projects**. Start a new Visual Basic project for each interface. **Note**: You will have to experiment with some Visual Basic properties that have not been covered in the Unit 8 introductory lesson.

Be certain to name all project objects using the correct prefix and naming convention.
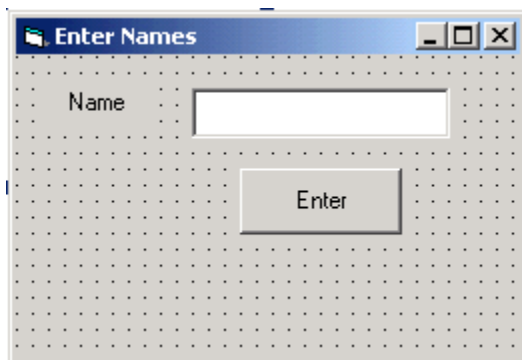

Project 1:
Create the interface shown in the image below:

Save this project as **vbpU8_DynamicDuo**.

Project 2:
Create the interface shown in the image below:

Save this project as **vbpU8_EnterNames**.
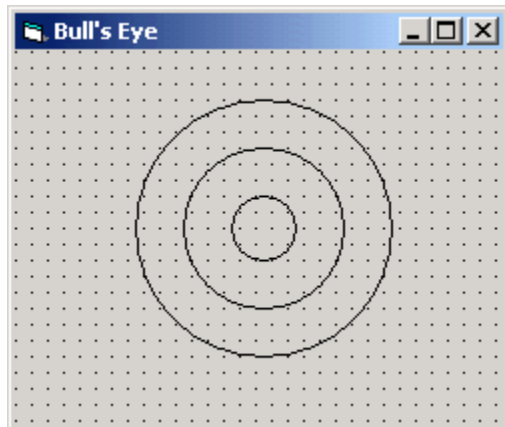

Project 3:
Create the interface shown in the image below:

**Save** this project as **vbpU8_TheClass**.

Project 4:
Create the interface shown in the image below:

Save this project as **vbpU8_BullsEye**.

Project 5:
Create the interface shown in the image below:

Save this project as **vbpU8_Wisdom**.

Project 6:
Reproduce your student ID card on a Visual Basic form.

Save your project as **vbpU8_IDCard**.
