1. Fizzicks jumps off a diving board with a horizontal velocity of $+3.1 \mathrm{~m} / \mathrm{s}$ and lands in the water 1.8 s later. How high was the diving board and how far from the edge of the board did he land? ( $16 \mathrm{~m}, 5.6 \mathrm{~m}$ )
2. A ball bearing traveling with constant speed rolls off a lab bench that is 0.928 m high. If it hits the ground 0.422 m from the edge of the bench, how fast was the ball bearing rolling across the table initially? ( $0.970 \mathrm{~m} / \mathrm{s}$ )
3. Johnny shoots a stone horizontally with a velocity of $+25 \mathrm{~m} / \mathrm{s}$ from his slingshot while standing on the roof of a building on his father's farm. When he dropped an identical stone from the same spot, it took 1.85 s to hit the ground. What was the height of the building? ( 16.8 m )
4. A stone is thrown horizontally from a cliff 15.0 m high.
a) The initial velocity is $+24.0 \mathrm{~m} / \mathrm{s}$. How far from the base of the cliff does the stone strike the ground? ( 42.0 m )
b) What is the final vertical velocity of the stone just before the stone hits the ground? ( $-17.1 \mathrm{~m} / \mathrm{s}$ )
c) Calculate the velocity of the stone just before the stone hits the ground? $\left(29.5 \mathrm{~m} / \mathrm{s}, 35.5^{\circ} \mathrm{S}\right.$ of E$)$
5. A cannonball is fired from a cannon. If the initial horizontal and vertical components of the velocity are $+32 \mathrm{~m} / \mathrm{s}$ and $+27 \mathrm{~m} / \mathrm{s}$ respectively, at what angle was the cannon ball launched and at what speed was it fired? ( $40^{\circ}$ to the horizontal, $42 \mathrm{~m} / \mathrm{s}$ ) How long will the cannonball be in the air? (5.5 s)
6. A projectile fired at an angle remains in the air for 8.42 s after it is fired. The initial horizontal component of its velocity is $+150 \mathrm{~m} / \mathrm{s}$.
a) How far forward did the projectile move forward before it hit the ground? $\left(1.26 \times 10^{3} \mathrm{~m}\right)$
b) How long after being fired did it reach its maximum height? (4.21 s)
7. A ball is thrown from the top of one building toward the wall of a second taller building 15.2 m away. The ball is thrown with an initial velocity of $6.10 \mathrm{~m} / \mathrm{s}$ at an angle of $40.0^{\circ}$ to the horizontal. How far below its original position does the ball hit the second building? ( 39.1 m below its original position)
8. A baseball player throws a ball from center field to home plate with a velocity of $35.0 \mathrm{~m} / \mathrm{s}$ at an angle of $30.0^{\circ}$ with the ground. Assuming the ball is caught at the same height at which it was thrown; calculate the horizontal distance traveled by the ball before it is caught. ( 108 m )
9. A projectile is fired with an initial velocity of $75.2 \mathrm{~m} / \mathrm{s}$ at an angle of $34.5^{\circ}$ above the horizontal along a long flat firing range. Determine the
a) maximum height reached by the projectile ( 92.7 m )
b) range of the projectile ( 539 m )
c) speed of the projectile 1.50 s after being fired $(68.0 \mathrm{~m} / \mathrm{s})$
10. A hockey player hits a puck with his hockey stick and the puck is launched at an angle of $45^{\circ}$ to the ice surface. The puck hits the ice 35 m down the length of the rink. Find the velocity of the puck when it left the hockey stick. ( $19 \mathrm{~m} / \mathrm{s}$ at $45^{\circ}$ to the horizontal)
11. A no good thief steals Mrs. Corlette's purse and makes a run for it. Mrs. Corlette, being puny and weak, calls for help. Mr. MacDonald sees this happen and gets angry, turns green, muscles rip his shirt apart, and he wants to smash. Mr. MacDonald becomes the Phulk and grabs a red Volkswagen Beetle at the spot the purse was stolen and throws it East at an angle of $45^{\circ}$ to the horizontal. The instant the doomed Beetle left the Phulk's hand the thief has run for 8.7 seconds at a constant velocity of $3.2 \mathrm{~m} / \mathrm{s}$ [E]. With what initial speed does the Phulk have to throw the car so that it hits the running thief? $(19 \mathrm{~m} / \mathrm{s})$
12. A cannonball has a muzzle speed of $35 \mathrm{~m} / \mathrm{s}$. If the cannon ball is launched from the ground then what is the maximum range of the cannonball? ( 125 m )
13. Suppose the cannon from \#12 were placed on a 17 m high castle wall. What is its new maximum range? ( 140 m )
14. How high should the cannon from \#12 be placed to pulverize advancing orcs that are 200 m away; assuming that 200 m is the maximum range of the cannon? $(120 \mathrm{~m})$
15. The King, fed up with stupid, ugly orcs, wants to increase the maximum range of his cannons to 500 m . The cannons are placed 25 m up in the castle. What muzzle speed should the cannonballs have? $(68.3 \mathrm{~m} / \mathrm{s})$
16. A football receiver sprints down the field after the ball is snapped at a constant speed of 4.8 $\mathrm{m} / \mathrm{s}$. The quarterback runs to a point 6.3 m behind where the receiver was before the snap and throws the football at an angle of $60^{\circ}$ to the horizontal. With was speed must the football leave the quarterback's hand if the time between the snap and throw was 5.1 seconds? ( $24 \mathrm{~m} / \mathrm{s}$ )
17. Text, Page 549 PP \#14 (nasty question, don't hurt me!)
