

# ***Astronomy 120 Solar System Research Project***

Write a detailed report on a topic from the list below (each student researches a unique topic - ask if you have a different topic):

- Mercury
- Venus
- Mars
- Jupiter
- Saturn
- Uranus
- Neptune & Triton
- Pluto
- Galilean Satellites
- Titan & Enceladus
- Earth's Moon
- Comets & Asteroids
- Extra Solar Planets
- Space Travel & Exploration

- Submit electronically in MS Word (recommend you use a memory stick).
- Standard report format (Title page, outline page, intro, body, and conclusion).
- Times New Roman (12 font), 1" margins, 1.5 spacing, about 800 – 1000 words.
- Include images, tables, etc. Be sure to properly reference them.
- References must include your text, a website (no Wikipedia), and a magazine.
- Rubric to follow.

## **Timeline**

- ❖ Friday, March 4<sup>th</sup> – Reference List (may not be your final list): 10 Marks
- ❖ Monday, March 21<sup>st</sup> – Copy of your draft: 15 Marks
- ❖ Monday, April 4<sup>th</sup> – Final Project Due: 60 Marks
