Assignment 7A

Create a program where the user inputs an integer number of days. The program will calculate and output the number of years, months, weeks and days. Below are the conversions:

- 365 days = 1 year
- 30 days = 1 month
- 7 days = 1 week

Assignment 7B

Create a program that converts a user-inputted number of inches in to miles, yards, feet and inches. Below are the conversions:

- 63360 inches = 1 mile
- 36 inches = 1 yard
- 12 inches = 1 foot
