Cell Phones

Due to poor results from semester 1 and their continuous distraction, cell phones will be placed in a bag (with your name on it) and kept in a container at the front of the room. At the start of each class turn them off (or silent) and bring them to the front.

Course Topics

Review of Semester 1

Unit 4: Linear Relations (~4 weeks)

Unit 6: Linear Equations and Inequalities (~4 weeks)

Unit 7: Similarity and Transformations (~5 weeks)

Unit 8: Circle Geometry (~5 weeks)

Unit 9: Probability and Statistics (~2 weeks)

Study Block

Every Thursday during study block students will be given a review assignment containing material from the start of the semester to present and will be due at the end of study block. This assignment will be marked and returned. The next week a similar assignment will be given and if the mark is higher it will replace the previous and so-on for the semester. Every test this semester will contain a small number of review questions. Successful completion of these questions will yield a few bonus marks.

Grading

- Course Work (tests, projects, etc):   70%
- Final Exam   30%
