

Kingdom Protista and Fungi Review Sheet

Key terms to know for Kingdom Protista Chapter 20 (Pgs 497-520):

Define the following:

Protist	Micronucleus	Chrysophytes
Zooflagellates	Gullet	Diatoms
Pseudopods	Anal pore	Dinoflagellates
Amoeboid movement	Contractile vacuole	Red Algae
Food vacuole	Conjugation	Brown Algae
Amoeba	Sporozoan	Green Algae
Ciliates	Malaria	Slime Mold
Cilia	Euglena	
Trichocysts	Eyespot	
Macronucleus	Pellicule	

1. What are the characteristics of protists?
2. What are the four types of animal-like protists?
3. Name an example of a sarcodine. (You should know the structures and functions too)
4. Name an example of a ciliate. (You should know the structures and functions)
5. What is malaria?
6. What is Euglena? (You should know the structure)
7. Name examples of other unicellular algae.
8. Name three examples of multicellular algae.
9. Name an example of a fungus-like protists.
10. What was the Great Potato Famine?

Optional:
