

Welcome to JMH Grade 9 Math Home Learning!

First, we would like you all to know how much we (your teachers and educational assistants) miss seeing you all in Math class. Unfortunately, unless a miracle happens, we will not all be together until September. The time has come to get back to learning. Not sure if you are aware that you have access to the Microsoft Products, such as Word, Excel, Power Point, Teams and Outlook. In your browser type Office 365 Login and use your school email address and password.

Assignment:

Join the JMH Grade 9 Math Home Learning team by opening Teams on your computer or here: <https://teams.microsoft.com> . Once opened, join the Grade 9 Math team (button near the top right of the screen), select **Join a Team with a code**, and enter **02bbwkv**.

JMH Grade 9 Math Home Learning is the team name. Once you are in, click on the top task bar and choose **Files**, you will find folders for the various Math units. You will either click on **Linear Equations and Inequalities** or the **Linear Relations** folder. Most of you in Grade 9 Math (Mrs. Burns, Mrs. Gouchie and Mrs. Moran classes) will be working in **Linear Relations** (the first lesson will be a review) to get you started. The folders will contain lessons and assignments. If you have questions, click on **Posts** and start a conversation, we will do our best to help you.

Mrs. Gouchie's / Mrs. McIntyre's Personalized Learners Only

*Some of you will be working in Equations and Inequalities. If so, you will open that folder in the **Files**. Those who have gone beyond the first Focus in Linear Equations, send Mrs. Gouchie and email and she will help you out.*

This is new for teachers and students, try not to get overwhelmed. We realize most of you do not have your textbooks at home. No problem, all you need is the file in teams, pencil and a calculator. Guess we can no longer stop you from using your phone as a calculator (ha ha). If you are unable to access for any reason, please contact your teacher.

riley.burns@nbed.nb.ca

tammy.gouchie@nbed.nb.ca

tammy.mcintyre@nbed.nb.ca

sherri.moran@nbed.nb.ca

Some of you are on a Personalized Learning Plans, if so, your teacher will be calling you.

STAY HOME AND BE SAFE!!

Here's a Puzzle, can't wait to see your solutions.

The missing \$1

This is a famous and truly brain-bending riddle! It really deceives you and makes you feel like something's not right — yet it can feel hard to put your finger on it and find the error in reasoning.

Three people rent a room at \$30. They pay \$10 each and go up to the room. The owner realized he charged too much and it was only supposed to be \$25. He sends the bell hop up with the \$5. Each of the people keeps \$1 and they give the bellhop \$2 as they can't share it. So now each person has paid \$9 for the room (total \$27) and the bell hop has \$2... where is the other \$1???

The solution will be posted tomorrow.
