

Parallel & Perpendicular Lines

Parallel Lines

Parallel Lines are two lines that are always the same distance apart, and that never intersect.

Parallel Lines

Calculate the slope of segments AB & CD

<i>1st</i>	x_1	y_1	<i>2nd</i>	x_2	y_2	<i>1st</i>	x_1	y_1	<i>2nd</i>	x_2	y_2
	$(-2, 0)$			$(2, 6)$			$(2, 0)$			$(6, 6)$	
AB	=		$\frac{y_2 - y_1}{x_2 - x_1}$	CD	=		$\frac{y_2 - y_1}{x_2 - x_1}$				

$$\begin{aligned}
 AB &= \frac{6 - 0}{2 - (-2)} \\
 &= \frac{6}{4} \\
 &= \frac{3}{2}
 \end{aligned}
 \qquad
 \begin{aligned}
 CD &= \frac{6 - 0}{6 - 2} \\
 &= \frac{6}{4} \\
 &= \frac{3}{2}
 \end{aligned}$$

What Do You Notice?

Parallel Slopes are Equal

Slope of AB = Slope of CD, therefore

\overleftrightarrow{AB} is parallel to \overleftrightarrow{CD}
↑
same

Perpendicular Lines

Perpendicular Lines are two lines that intersect to form a 90° angle. (Right Angle)

1 2 3 4 5 6 7 8 9 10

Lines

Calculate the slope of
AB & DC

AB 1st x_1, y_1 (4, 5) 2nd x_2, y_2 (8, 3)

$$\frac{3-5}{8-4} = -\frac{2}{4} = -\frac{1}{2}$$

CD 1st x_1, y_1 (2, -1) 2nd x_2, y_2 (4, 3)

$$\frac{3-(-1)}{4-2} = \frac{4}{2} = 2$$

What Do You Notice?

Therefore if the slopes of two lines are

OPPOSITE RECIPROCAL

we can say the lines are perpendicular

$$\frac{2}{3} \leftrightarrow -\frac{3}{2}$$

Therefore AB is perpendicular to DC

What is the slope of the y-axis?

Undefined or $\frac{1}{0}$

What is the slope of the x-axis?

0 or $\frac{0}{1}$

What is the slope ~~parallel~~ to the x-axis?
Same

$$= 0 \text{ or } \frac{0}{1}$$

What is the slope parallel to the y-axis?

same

Undefined $\frac{1}{0}$

What is the slope perpendicular to the x-axis?
opp rec.

Undefined

$-\frac{1}{0}$ or $\frac{1}{0}$

What is the slope perpendicular to the y-axis?
opp[↑] rec.

0 or $\frac{0}{1}$

State the slope parallel to $y = 5x - 3$.
Same $y = mx + b$

$$= 5$$

$$= 5$$

State the slope perpendicular to $y = 4/5x - 3$

Opp rec

$$m = 4/5$$

$$= -\frac{5}{4}$$

State the slope parallel to $y = -8x + 7$

Same

$$m = -8$$

$$= -8$$

State the slope perpendicular to $y = -2/3x - 4$

Opp rec.

$$m = -2/3$$

$$= +3/2$$

State the slope perpendicular to $y = -2x + 8$

opp rec.

$$m = \frac{-2}{1}$$

$$= \frac{1}{2}$$

Determine whether or not the following figure is a rectangle.
