

Write an equation that is equivalent to each of the following!!!!!!

1.  $(6) - (4) = 2$

$(6) + (-4) = 2$

2.  $(7) - (-4) =$

$(7) + (+4) = 11$

3.  $(-5) - (-7) =$

$(-5) + (+7) = +2$

 <http://www.youtube.com/watch?v=FsxXltuUFQM>

1.  $(-8) - (-4) =$

$$(-8) + (+4) = -4$$

2.  $(10) - (9) = 1$

3.  $(-5.2) - (-3.4) =$

$$(-5.2) + (+3.4) = -1.8$$

4.  $\left(\frac{9}{4}\right) + \left(\frac{+3}{4}\right) = \frac{12}{4} = 3$

5.  $11 - -3 + 5 - (7) =$

$$11 + (+3) + (+5) + (-7) =$$

$$19 + (-7) = +12$$

$$\left(\frac{2 \times 2}{3 \times 2}\right) - \left(-\frac{4 \times 3}{2 \times 3}\right) =$$

$$\left(\frac{4}{6}\right) - \left(-\frac{12}{6}\right) =$$

$$\left(\frac{4}{6}\right) + \left(\frac{+12}{6}\right) = \frac{16}{6} \div 2$$
$$= \frac{8}{3}$$
