

1. a) Hailee charges \$12.00 for a 12" homemade pizza. It costs her \$6.50 to prepare the pizza, by what percentage did she mark up the price?
- b) Hailee wants to make \$6.50 on every 15" pizza she sells. If it costs her \$7.00 to make, by what percentage will she mark up the price?

$$a) 12.00 - 6.50 = 5.50 \leftarrow \text{Markup}$$

$$\frac{\text{Markup}}{\text{Org.}} = \frac{5.50}{6.50} = 0.85$$

85% Markup.

$$b) \frac{\text{Markup}}{\text{Org.}} = \frac{6.50}{7.00} = 0.93$$

93% Markup.

2. iTunes had a sale on downloading music. You could purchase 20 songs from the top 100 list for \$15.00. How much would you be paying for one song with this deal?

$$\frac{\$15.00}{20 \text{ songs.}} = 0.75 / \text{song.}$$

3. A lawnmower's engine uses a mixture of 5 L of gas and 0.5L of oil. How much oil must you mix with 2L of gas to refuel the lawnmower?

Let $x = \text{oil}$

$\frac{\text{Gas}}{\text{oil}}$

$$\frac{5}{0.5} = \frac{2}{x}$$

$$5x = \frac{1}{5}$$

$$x = 0.2 \text{ L of oil}$$

4. If the ratio of loaves of white bread sold compared to loaves of whole wheat bread sold is 3:1 and a bakery sells 100 loaves of whole wheat bread in a day, how many loaves of white bread would it sell in a day?

$$\begin{array}{ccc}
 3 & : & 1 \\
 \uparrow & & \uparrow \\
 \text{WB} & & \text{WWB} \\
 x & : & 100
 \end{array}$$

Let $x = \text{white}$

$$\frac{\text{WW}}{\text{white}}$$

$$\frac{1}{3} = \frac{100}{x}$$

$$x = 300$$

5. a) If you have 5200 pesos, how many Canadian dollars can you exchange them for? (currency exchange)

Bank Buying Rate = 0.083443

Bank Selling Rate = 0.108443

- b) If you decided not to go to Mexico, how much money would you lose in the exchange?

$$\begin{aligned}
 & x = \text{CAD} \\
 \text{a) } & \frac{\text{USD}}{\text{rate}} = \frac{\text{USD}}{\text{CAD}} \\
 & \frac{1}{0.083443} = \frac{5200}{x} \\
 & x = \$433.90 \text{ CAD}
 \end{aligned}$$

6. The price of a new HD-PVR is \$600.00.

- How much would a customer pay in Nova Scotia, where they are taxed 15%?
- How much would a customer pay in New Brunswick, where they are taxed 13%?
- How much do you save buying it in New Brunswick?

d) PEI where they have 5% GST 10% PST how much?

$$a) 600 \times 1.15 = \$690.00$$

$$b) 600 \times 1.13 = \$678.00$$

$$c) 690 - 678 = \$12$$

$$d) \begin{array}{l} 600 \times 1.05 = 630 \\ \underline{630} \times 1.10 = 693.00 \end{array}$$

If Jennifer purchased 5,678 Australian dollars for \$6,259.43 CAD, what was the bank's selling rate?

$$\frac{1}{\text{rate}} = \frac{\text{FOR}}{\text{CAD}}$$

$$\frac{1}{x} = \frac{5678}{6259.43}$$

$$\frac{5678x}{5678} = \frac{6259.43}{5678}$$

$$x = 1.1024$$

7. Troy sells hockey equipment. He is offering a sale of 30% off all items in the store. Helmets regularly sell for \$29.99 each, shoulder pads for \$39.99, and hockey sticks for \$79.95 each.

How much will it cost to buy 5 helmets, 4 sets of shoulder pads, and 6 hockey sticks?

7. Troy sells hockey equipment. He is offering a sale of 30% off all items in the store. Helmets regularly sell for \$29.99 each, shoulder pads for \$39.99, and hockey sticks for \$79.95 each.

How much will it cost to buy 5 helmets, 4 sets of shoulder pads, and 6 hockey sticks?

New Price

$$29.99 \times 0.70 = 20.99$$

$$39.99 \times 0.70 = 27.99$$

$$79.95 \times 0.70 = 55.97$$

$$5 \text{ Helmets} - 5 \times 20.99 = \$104.95$$

$$4 \text{ shoulders pads} - 4 \times 27.99 = \$111.96$$

$$6 \text{ hockey sticks} - 6 \times 55.97 = \$335.82$$

$$\$552.72$$

Recipe #1

3 cups of concentrate
7 cups of water

You only want to make 8 cups of Recipe #1. How many cups of concentrate and how many cups of water will you need? Explain your solution.

- **This is a question dealing with totals!!!!!!**
- **We will determine the total of the batch & set up a total ratio.**

Batch Total

of concentrate = 3
of water = 7

Total # = 10

Recipe #1

3 cups of concentrate
7 cups of water

You only want to make 8 cups of Recipe #1. How many cups of concentrate and how many cups of water will you need? Explain your solution.

Batch Total

$$\begin{array}{l} \# \text{ of concentrate} = 3 \\ \# \text{ of water} = 7 \end{array}$$

Total # = 10

Total Ratio

Let x = concentrate

$$\frac{\# \text{ of concentrate}}{\text{Total}}$$

$$\frac{3}{10} = \frac{x}{8}$$

$$\rightarrow 10x = 24$$

$$\rightarrow x = 2.4$$

Recipe #1

3 cups of concentrate
7 cups of water

You only want to make 8 cups of Recipe #1. How many cups of concentrate and how many cups of water will you need? Explain your solution.

Batch Total

of concentrate = 3
of water = 7

Total # = 10**Total Ratio**Let x = concentrate

of concentrate
Total

$$\frac{3}{10} = \frac{x}{8}$$

$$10x = 24$$

$$x = 2.4$$

2.4 Cups of Concentrate**Water = Total # - Concentrate**

$$\text{Water} = 8 - 2.4$$

5.6 Cups of Water!!!!
