1) Digestive System Problems

Warm - Up

More than 330,000 Canadians are believed to be affected by celiac disease with only approximately 110,000 diagnosed.

Digestive System Problems Video

Problems with Digestion

Tooth Decay = the most common digestive problem

caused by bacteria that live in the mouth

prevented by daily brushing and flossing of teeth

Food allergies

when our bodies react to substances in food and think they are invaders in your body.

symptoms include itching and swelling of the lips and mouth and can be severe (trouble breathing, throat closure etc)
