

Writing a Discussion/Conclusion

When writing your conclusion there is no I, We, They, Me, Us etc no mention of a person it also needs to be in the past tense.

In your discussion, include the following...

- Give the results from the 1st procedure in detail.

How much did the reactants weigh? The products?

What was the difference?

- Give an explanation of the results from the 1st procedure.

-Why do you think this difference of mass occurred between the reactants and products?

- State the hypothesis you tested and what you did differently in the second lab.
- Did the data support or refute the hypothesis?
- Give the results from the 2nd lab in detail.

How much did the reactants weigh? The products?

What was the difference?

- Give an explanation of the results from the 2nd procedure.

If you had a difference in mass why do you think this difference occurred?

- Major Errors
